

StratRoom — AI Chat Engines Verification & Demo Brief

Executive Live Verification Report & Manager Presentation Prompts

Date: August 12, 2026	Environment: Production (103.191.132.36:8088)	Session Scope: dominic@demo.com	Overall Status: 100% PASS (5/5)
-----------------------	--	------------------------------------	--

1. Executive Live Verification Summary

#	Chat Engine	Sample Test Prompt	Target Backend Tool / Route	Live MySQL Table	Result
1	Task Chat Agent	Update progress of task 32 to 100%	update_task_progress	task_details	PASS
2	Initiative & Project Agent	Update initiative 8 progress to 80%	update_initiative_progress	initiatives_details	PASS
3	Risk Management Agent	Show all high impact risk items	query_risks / POST /risks/simulate	risk_details	PASS
4	Strategy & Scorecard Agent	Show perspective details for Financial Performance	query_scorecards	scorecard_kpis & score_card	PASS
5	Incidents & Decisions Agent	List all pending executive decisions	query_decisions / riskeventlist	decisions & risk_event	PASS

2. Manager Briefing: 3 Test Prompts Per Chat Engine

1. Task Execution & Backlog Agent

Handles task progress updates, status transitions, RBAC task queries, and automated backlog management.

#	Demonstration Prompt	Backend Tool / Route	Live Action & Business Outcome
1	"Update progress of task 32 to 100%"	update_task_progress	Updates task_details in MySQL, clamps progress to 100%, and auto-flips status to 'completed'.
2	"Show all critical priority tasks assigned to me"	query_tasks	Filters tasks by Dominic's owner email (dominic@demo.com) and priority 'Critical'.
3	"Create a high priority task to review Q4 budget allocations"	create_task	Instantiates a new actionable task record in MySQL assigned to Dominic with 'pending' status.

2. Strategic Initiatives & Projects Agent

Manages organization-wide strategic initiatives, progress tracking, visual indicators, and project milestones without overlapping with task IDs.

#	Demonstration Prompt	Backend Tool / Route	Live Action & Business Outcome
1	"Update initiative 8 progress to 80%"	update_initiative_progress	Updates initiatives_details (progressval = 80), updates statusLight (GREEN bar), and leaves Task #8 untouched.
2	"Show all active strategic initiatives and their progress status"	query_initiatives	Retrieves full initiative portfolio breakdown with completion percentages and visual health lights.
3	"List all off-track or red-flagged projects"	query_initiatives	Filters initiatives with progress < 40% (RED indicator) for rapid executive intervention.

3. Risk Management & Analytics Agent

Queries live threat profiles, residual risk heat scores, mitigations, and runs Monte Carlo statistical risk simulations.

#	Demonstration Prompt	Backend Tool / Route	Live Action & Business Outcome
1	"Show all high impact risk items"	query_risks	Queries live risks from risk_details filtered by heat score >= 10 under Dominic's RBAC scope.
2	"Run a Monte Carlo risk simulation for organizational loss exposure"	POST /risks/simulate	Runs 10,000 simulation iterations returning Expected Loss, VaR (\$6.86M), CVaR (\$7.83M), P99, and Resilience Rating (71.95%).
3	"Update residual impact for risk 1 to 2 and add a mitigation plan"	update_risk	Real-time write to MySQL risk_details, recalculating residual heat score and updating mitigation text.

4. Strategy & Scorecard Agent

Analyzes Balanced Scorecard metrics across Financial, Customer, Internal Processes, Learning & Growth, ESG, and Risk perspectives.

#	Demonstration Prompt	Backend Tool / Route	Live Action & Business Outcome
1	"Show perspective details for Financial Performance"	query_scorecards	Reads live KPI metrics, targets, actuals, and gap percentages for 61 Financial KPIs from scorecard_kpis.
2	"Give me an aggregated summary of all 6 scorecard perspectives"	query_scorecard_summary	Computes average actual scores, total KPI counts, and on-track vs. at-risk breakdown per perspective.
3	"Show all at-risk and critical KPIs requiring executive attention"	query_scorecards	Filters scorecard items where status = 'at-risk' or 'critical' for targeted strategic review.

5. Incidents, Decisions & Board Agent

Tracks executive decision registers, pending C-suite approvals, incident logs, and board governance items.

#	Demonstration Prompt	Backend Tool / Route	Live Action & Business Outcome
1	"List all pending executive decisions"	query_decisions	Fetches open decision approvals requiring executive action (e.g. AI Expansion, Security Mitigation Plan).
2	"Approve executive decision 6"	update_decision_status	Updates decision status from 'Pending' to 'Approved' live in the MySQL decisions table.
3	"Show recent critical incident logs requiring remediation"	/stratroom/riskeventlist	Queries active incident logs and loss events from MySQL risk_event table for board reporting.

3. Quick Copy-Paste Prompt Sheet for Live Demo

Copy and paste any of these 15 prompts directly into the StratRoom AI Chat interface during the demo:

TASK CHAT AGENT 1. Update progress of task 32 to 100% 2. Show all critical priority tasks assigned to me 3. Create a high priority task to review Q4 budget allocations INITIATIVES & PROJECTS AGENT 1. Update initiative 8 progress to 80% 2. Show all active strategic initiatives and their progress status 3. List all off-track or red-flagged projects RISK MANAGEMENT AGENT 1. Show all high impact risk items 2. Run a Monte Carlo risk simulation for organizational loss exposure 3. Update residual impact for risk 1 to 2 and add a mitigation plan	STRATEGY & SCORECARD AGENT 1. Show perspective details for Financial Performance 2. Give me an aggregated summary of all 6 scorecard perspectives 3. Show all at-risk and critical KPIs requiring executive attention INCIDENTS & DECISIONS AGENT 1. List all pending executive decisions 2. Approve executive decision 6 3. Show recent critical incident logs requiring remediation
